

Outside Radiology Reads

To be able to have radiology dictate their reads on outside studies we need to put orders in the computer. This creates an “accession number” for them and allows them to pin the reading to the correct patient. Below is where these orders are found. Please let me know if you have any questions or concerns.

Go to your preference list on the orders screen. Click “imaging” section and there will be a section titled “Outside Reads”. Choices are then the following:

OUTSIDE READ TRAUMA – NEURO

OUTSIDE READ TRAUMA – BODY

OUTSIDE READ ED – NEURO

OUTSIDE READ ED - BODY
